3. Prompt Evidence / Chat History

Prompt Evidence / Chat History:

<https://chatgpt.com/share/6ac63151-3368-83ee-aeac-7751ecd27ddb>

The chat contains the three prompts used for:

- **Prompt 1:** Task 1 – Card rank comparison
- **Prompt 2:** Tasks 2 and 3 – Streak multiplier and PUSH
- **Prompt 3:** Task 4 – Side-by-side card reveal

4. Features / Bugs Fixed

Task 1 – Card Rank Comparison

Bug: Card ranks were compared as strings, causing incorrect ordering for values such as 10, J, Q, and K.

Fixed Snippet:

```
if guess == "HIGHER":  
    correct = self.next_card.numeric_rank > self.current_card.numeric_rank  
else:  
    correct = self.next_card.numeric_rank < self.current_card.numeric_rank
```

Commit: 28de9cd

Task 2 – Consecutive Win Streak Multipliers

Feature: Added streak tracking and increasing score multipliers for consecutive correct predictions.

Snippet:

```
self.streak += 1  
self.multiplier = self.streak  
self.score += self.multiplier
```

Wrong predictions reset the streak and multiplier.

Commit: 3d09bfd

Task 3 – Tie / PUSH

Feature: Equal-rank cards are now treated as a tie.

Snippet:

```
if self.next_card.numeric_rank == self.current_card.numeric_rank:  
    self.status_msg = f"PUSH! {self.next_card.rank_str} vs {self.current_card.rank_str}"
```

A PUSH keeps the score and streak unchanged.

Commit: 454e103

Task 4 – Side-by-Side Card Reveal

Feature: The previous and newly drawn cards are displayed side-by-side briefly before the new card becomes current.

Snippet:

if self.revealing and self.next_card is not None:

```
    self.current_card.render(screen, left_x, 100, card_w, card_h)
```

```
    self.next_card.render(screen, right_x, 100, card_w, card_h)
```

A short reveal delay is controlled using:

```
self.reveal_duration = 1000
```

Commit: a32871c

5. Final Git Commit History

a32871c Add side-by-side card reveal

454e103 Add tie evaluation rules

3d09bfd Add consecutive win streak multipliers

28de9cd Fix card rank comparision from str to numeric
