

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

Name: CHAITHANYA .N

SRN: PES1UG24CS124

Section: B

Problem Statement

Digital Parking Reservation Gateway

Primary Domain

Campus and Academic Operations

Target Actors

Student, Security Staff, Parking Administrator

Deliverables

1. EPICs
2. Bundown chart

1. Figure 1: Jira Backlog showing the project Epics and User Stories

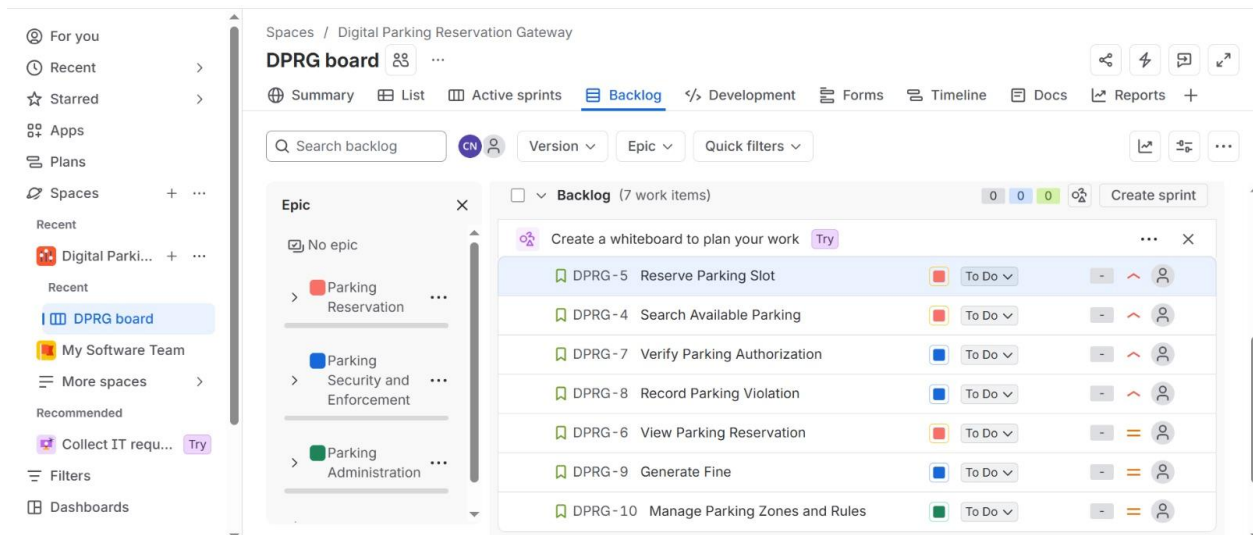

Figure 2: Story Point Estimation for the User Stories

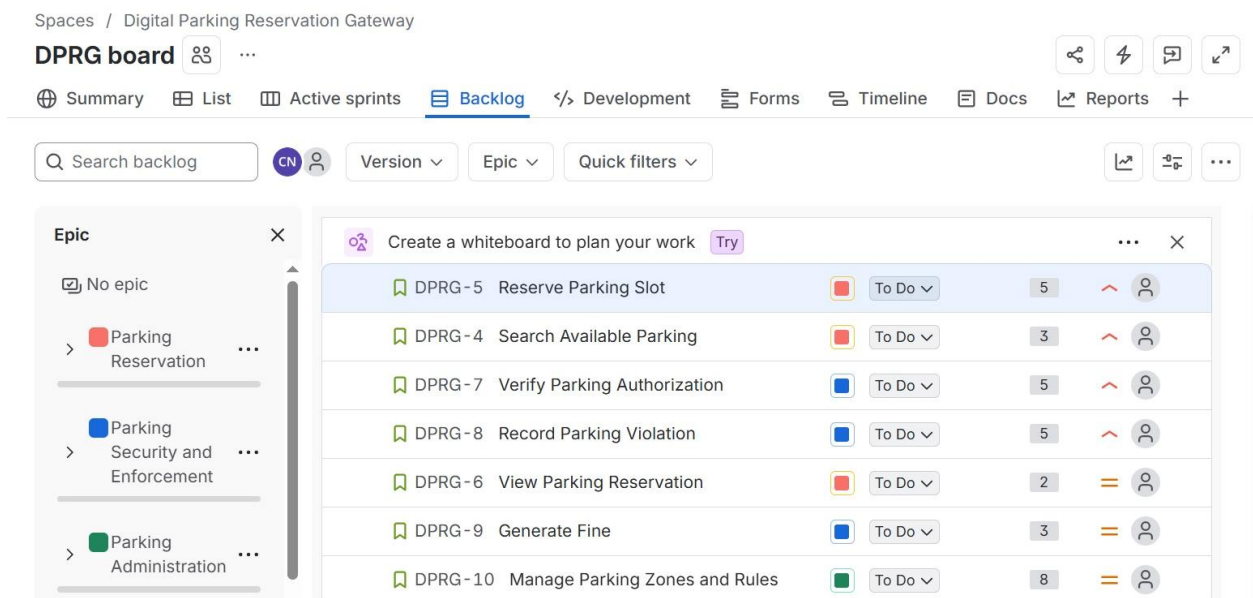

Figure 3 and 4: Sprint 1 Board showing the completed User Stories and Sprint 1 Report

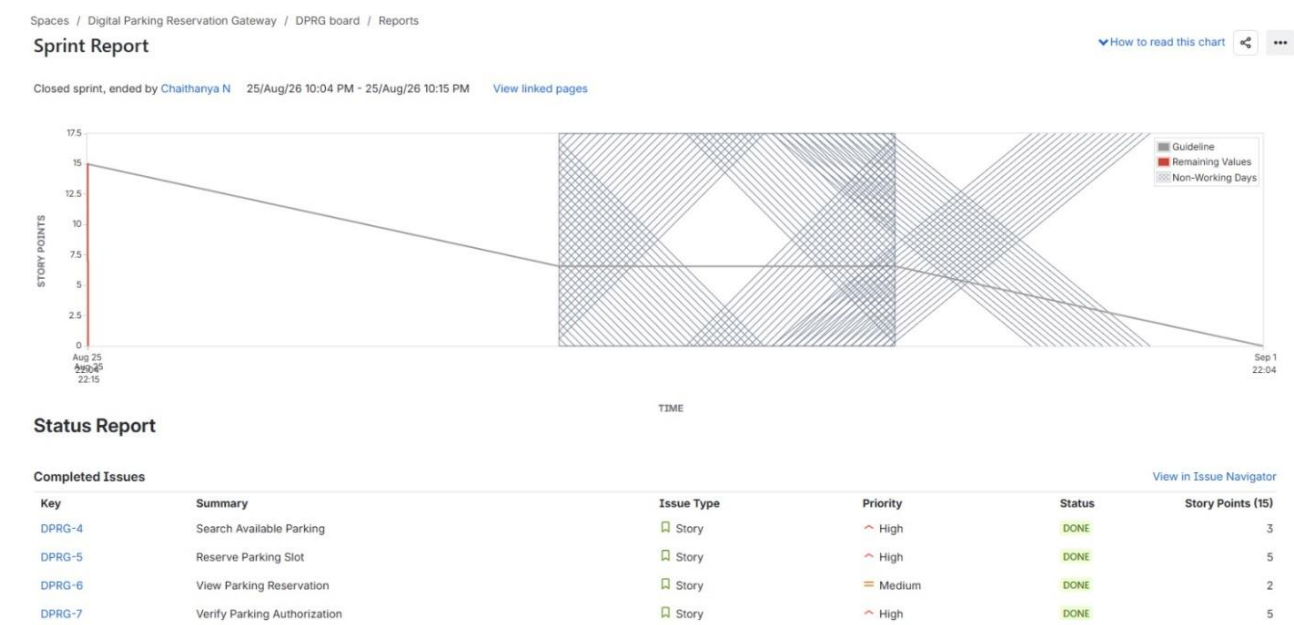

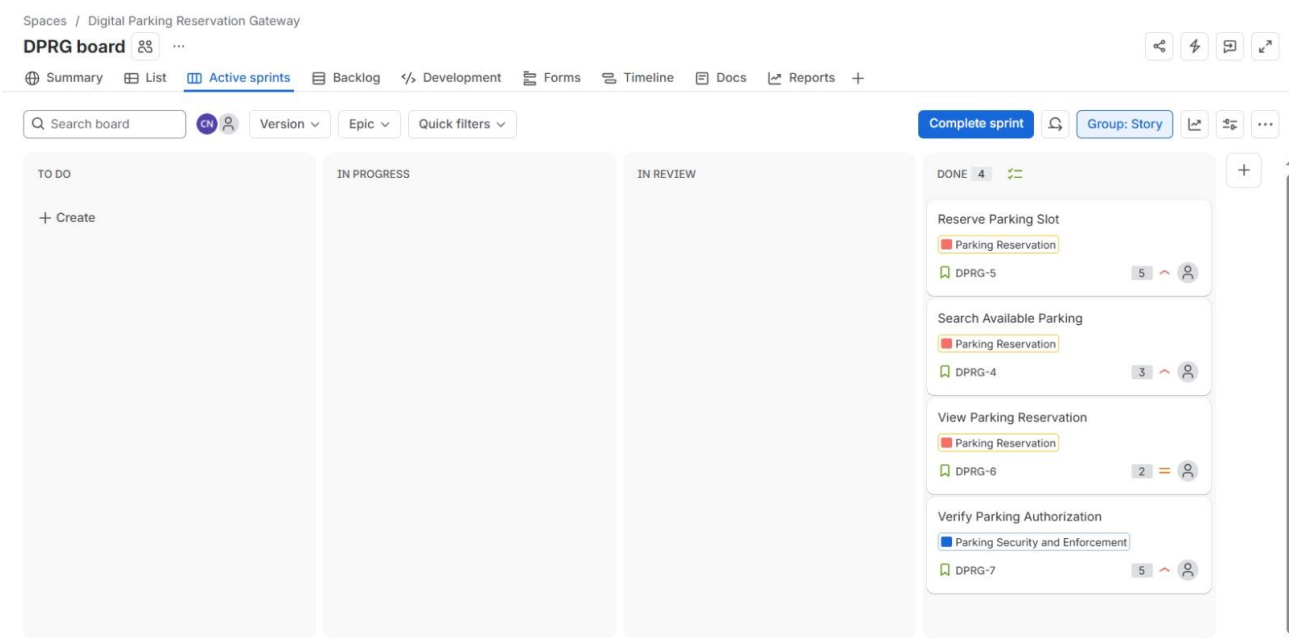

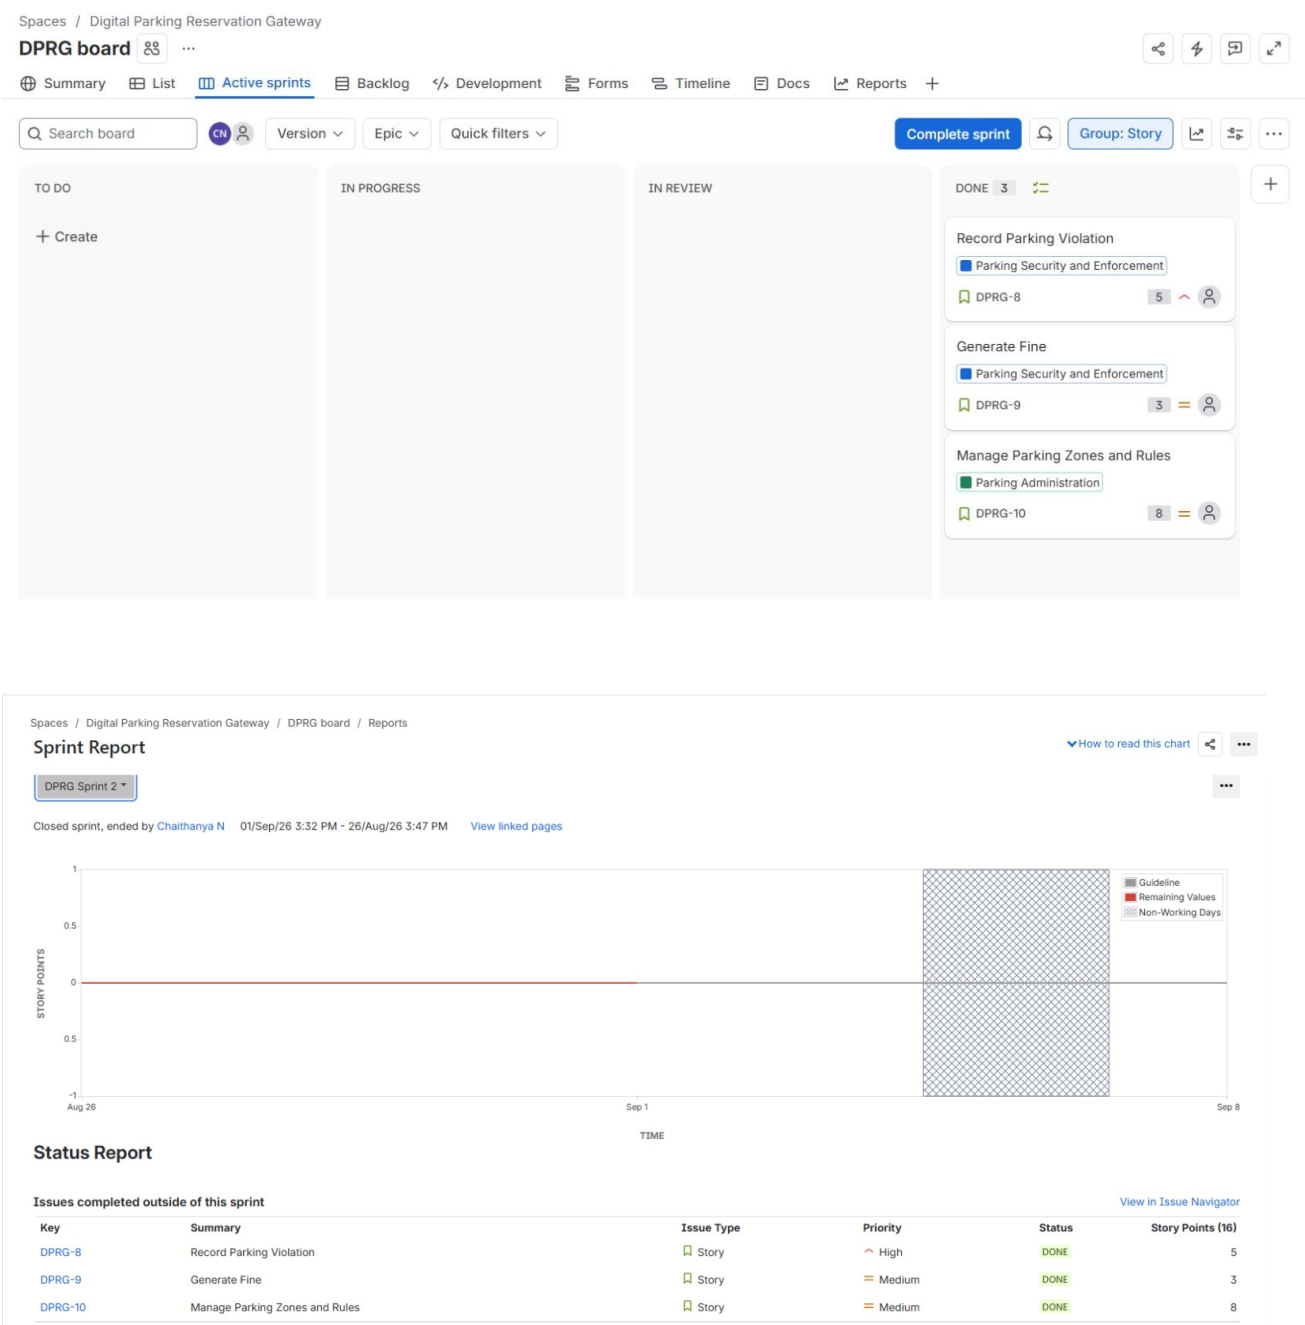

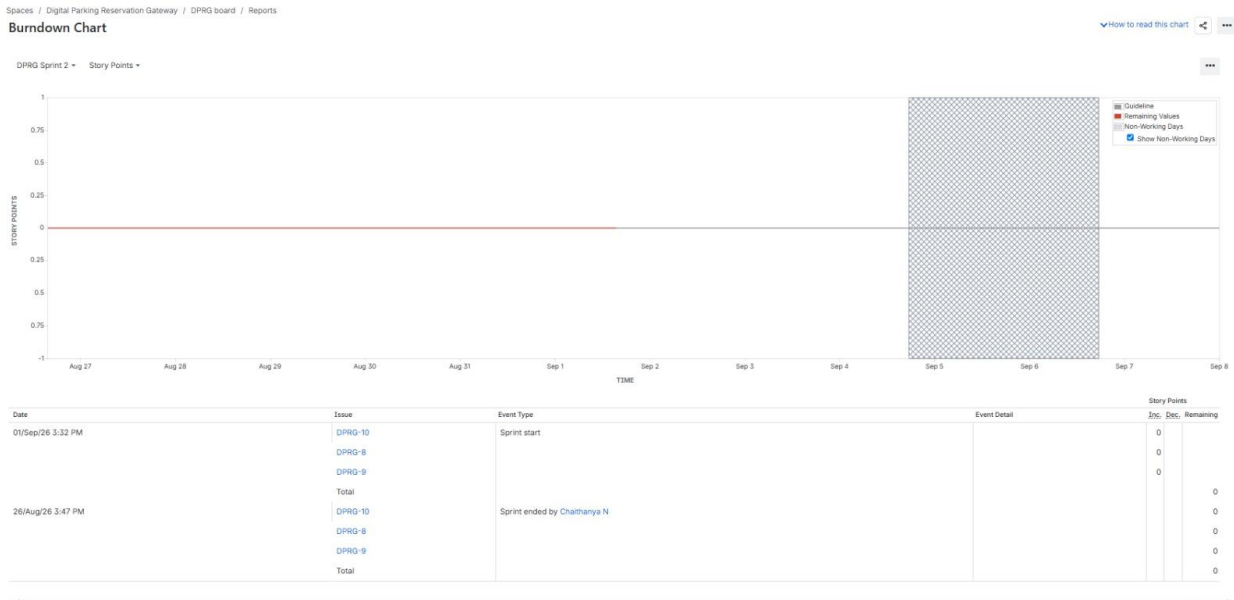

Figure 5 and 6: Sprint 2 Board showing the completed User Stories and the Sprint 2 Report

2. Figure 7: Sprint 2 Burndown Chart

REFLECTION:

1. Did your estimations reflect the actual effort?

Yes, the story points were mostly suitable for the effort required. The more complex stories were given higher points, and all the planned stories were completed.

2. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on importance to the users. The main parking reservation features were given higher priority before security and administration features.

3. How did your simulated sprint align with your plan?

The sprint followed my plan, with the 7 stories divided into two sprints. All the planned stories were completed successfully.

4. What insights did the burndown chart give about your team's capacity?

The burndown showed that all the planned work was completed. Since this was a simulation and the work were completed quickly, it did not accurately represent our actual team capacity.
